

Buckeye-Marketplace User Guide

1. Getting Started: Account & Login

Creating an Account: Click the "Sign Up" button on the landing page. Enter your OSU email and create a password.

Logging In: Use your credentials on the Login page. The system uses secure JWT authentication to keep your session active.

2. Browsing Products

The Marketplace: Upon logging in, you will see the Product Grid. You can scroll through items like textbooks, electronics, and dorm gear.

Search and Filter: Use the search bar at the top to find specific items (e.g., "Hibbeler Dynamics") or filter by category.

3. Adding Items to Cart

Selection: Click on a product card to see the Product Detail View.

The Action: Click the "Add to Cart" or "Add to Tracker" button. A notification will confirm the item has been added.

4. Placing an Order

Reviewing Cart: Click the shopping cart icon in the navigation bar to see your selected items.

Checkout: Verify your items and click "Place Order." For this marketplace, this sends a notification to the seller or saves the list to your tracker.

5. Viewing Order History

User Profile: Navigate to your "Account" or "Profile" section.

History: Click on "Order History" or "My Postings" to see a list of past transactions and their current status (e.g., Pending, Completed).

Buckeye-Marketplace Admin Guide

This guide provides administrators with the necessary steps to maintain the product catalog and oversee the fulfillment process within the Buckeye-Marketplace ecosystem.

How to Manage Products

The Admin Dashboard allows for real-time updates to the marketplace inventory, ensuring that product listings remain accurate and up-to-date.

1. Adding a New Product

- Navigate to the Admin Portal and select the Inventory tab.
- Click the Add New Product button.
- Fill in the required fields:
- Product Name: A concise title for the item.
- Description: Details regarding specifications, condition, or features.
- Price: Set the numerical value in USD.
- Category: Assign the product to relevant tags (e.g., Electronics, Textbooks, Apparel).
- Upload Image: Use the image upload utility to provide a visual reference for users.
- Click Publish to make the item live on the marketplace.

2. Editing or Removing Products

- Locating the specific item in the Product List.
- Select the Edit (Pencil Icon) to modify pricing, descriptions, or stock levels.
- Select Delete (Trash Icon) to remove an item that is no longer available or was listed in error. Confirm the prompt to finalize the removal from the database.

How to Update Order Status

Efficient order management ensures transparency for the customer from the moment of purchase to final delivery.

1. Accessing the Order Queue

- From the sidebar menu, select Orders.
- The main table displays all recent transactions, sorted by date (newest first).

2. Modifying Status

- Click on a specific Order ID to view the full transaction details, including the items purchased and shipping address.
- Locate the Status Dropdown menu. By default, new orders are set to Pending.
- Update the status based on the current stage of fulfillment:
- Processing: The order is being packaged or prepared.
- Shipped: The tracking information has been generated and the item is in transit.
- Delivered: The item has reached its destination.
- Cancelled: Used for refunds or stock-out scenarios.
- Click Update Status to save changes. An automated notification will be triggered to the user's account history.

3. Filtering Orders

- Use the Status Filter at the top of the page to quickly view all Pending orders that require immediate attention.
